

Certification Services

If you develop core technology platform products, you will know how critical it is that your products integrate seamlessly with other Independent Software and Hardware Vendors' (ISV and IHV) products. In fact, your customers will trust that you have prepared other suppliers to interoperate fully with your products.

AppLabs provides the industry's most prestigious certification programs, serving Independent Software

Vendors, Hardware Vendors and other suppliers. These programs enable vendors to undertake full certification of their products, allowing them to place program logos on their products and benefit from co-marketing.

Whether you develop core technology platform products, or are an independent vendor, an AppLabs Certification Program will ensure your customers always have complete confidence in your technology.

Certification Services Summary

AppLabs provides the IT industry's most prestigious certification programs serving Independent Software Vendors (ISVs), Independent Hardware Vendors (IHVs) and others. These allow vendors to place program logos on their products and benefit from co-marketing run by the respective logo owners.

If you represent a technology company running a partnership program, we can also help you create, administer and deliver a complete product certification program.

The different certification programs are highlighted below:

Cisco

- Cisco Technology Developer Program Security and VPN Solutions
- Cisco Technology Developer Program Wireless Networking Solutions
- Cisco Compatible Extensions Program
- Cisco Technology Developer Program IP Communications Solutions
- Cisco Intelligent Contact Management Program
- Cisco Technology Developer Program RFID
- Cisco Technology Developer Program Network Admission Control

VMware

- VMware Infrastructure Certification

VMware certification lets your customers know your products are VMware certified by using the VMware Certified logo on all marketing materials for the certified product.

Altiris

- Altiris Developer Program certification

Now part of Symantec Corp., Altiris is the leading vendor of IT Service Oriented Management solutions.

SpectraLink

- Voice Interoperability for Enterprise Wireless (VIEW)

The SpectraLink VIEW Certification Program is a partner program designed to ensure interoperability and maximum performance for enterprise Wi-Fi infrastructure products that support NetLink Wireless Telephones.

Sun Microsystems

- Java Powered

Sun Java Powered is for ISVs that want to promote the fact that they are Java Powered and verified by Sun.

Novell

- YES CERTIFIED Program

Novell YES program certifies hardware and software products for compatibility with Novell Netware and SuSE Linux environments.

EMC

- EMC Centera Proven

EMC Centera Proven is a highly visible way to demonstrate that your solution takes full advantage of the EMC Centera platform – an assurance that can prove crucial to sales.

Linux Certification Programs

- Linux-Tested

IHVs can use the Linux-Tested program to certify their products are compatible with the Linux OS and have been tested for complete functionality.

Microsoft

- Microsoft WHQL pre-testing program

IHVs and ISVs can use the Microsoft WHQL Pre-Testing program to ultimately obtain the Microsoft Designed for Windows logo for hardware and software products. This logo program is administered directly by Microsoft. AppLabs provides the pre-testing aspects.
